WHAT'S MISSING?

(Matthew 16:24-27)

INTRODUCTION

The newspaper articles do not mention "the soul" of man: (Matt. 10:28) "both soul and body"  
(Matthew 4:4) "Man shall not live by bread alone, but by every word of God."  
(Hebrews 9:27) "It is appointed unto man once to die, and after this comes judgment"  
(Ecclesiastes 9:5, 11:9, 12:1, 12:13-14)  
(Amos 4:12) "Prepare to meet thy God"

5 THINGS ABOUT THE JUDGMENT OF GOD - (Romans 2)

1. (v2) "But we are sure that the judgment of God is according to truth"

We make judgments by personal likes and dislikes feelings, majority rule  
The judgment of God is "according to truth."  
(John 17:17) "thy word is truth"  
(John 12:48-50) "the word that I have spoken will judge him in the last day"

2. (v3) "And do you think ... that you shall escape the judgment of God?" - inescapable

There are 4 possible ways of escaping man's judgment: 1) Offense will go undetected.  
2) Offender may escape beyond the bounds of jurisdiction. 3) Insufficient evidence  
at the trial or a legal loop-hole. 4) The convicted may escape from prison.  
You and I cannot escape, avoid, nor get out of God's judgment:  
(2 Corinthians 5:10; Hebrews 9:27)

3. (v5) "... the righteous judgment of God"

(2 Timothy 4:8) "the righteous judgment of God" - right, without prejudice or partiality,  
just, by the book, accurate, correct, true, straight.  
(Romans 2:11) "For there is no partiality with God.."

4. (v6) "who will render to each one according to his deeds"

(Ephesians 2:8-10) "For by grace you have been saved through faith ... not of works ...  
created in Christ Jesus for good works, which God prepared beforehand  
that we should walk in them."  
(Hebrews 6:9-12) "things that accompany salvation"  
(Romans 2:13) "for not the hearers of the law are just in the sight of God,  
but the doers of the law will be justified."  
(Romans 2:5, v8-9) "with your hardness and impenitent heart are treasuring up for  
yourself wrath ... and do not obey the truth ... "  
(Romans 2:7, v10) "eternal life ... to everyone who works what is good ... "

5. (v16) "in the day when God will judge the secrets of men by Jesus Christ,  
according to my gospel"

(2 Thessalonians 1:7-10, 2:13-14; Psalm 44:10-21)

NEW RESEARCH SUGGESTS THAT YOU CAN'T LIVE FOREVER

LOS ANGELES

Just how long can people live?

New research suggests there may be a limit to our life span — one that's hard to extend without some sort of breakthrough that fixes all age-related problems.

The record for the world's oldest person is 122 years and the odds of shattering that record are slim, according to an analysis published

Wednesday in the journal Nature.

"It seems extremely difficult if not impossible to break through that ceiling due to the complexity of the aging process," one of the researchers, Jan Vijg, a geneticist at the Albert Einstein College of Medicine in New York, said in an email.

Life expectancies in many countries have risen dramatically because of im-

provements in medical care and sanitation in the last century, and the maximum age of death has also increased, leading some to believe that there's no boundary to how long people can live.

In the new study, researchers analyzed mortality data from a global database. They found that while there have been strides in reducing deaths among cer-

tain groups — children, women during childbirth and the elderly — the rate of improvement was slower for the very old, those over 100 years old.

Next they examined how old centenarians were when they died. The record holder is Jeanne Calment, of France, who lived until 122 years old. Since her death in 1997, no one has broken her record.

Sum body

The five basic human survival needs are:

**1. Oxygen** — Generally speaking, a person deprived of oxygen for more than three to four minutes suffers brain death; after five to six, they are dead. This is the most absolute and fixed of needs.

**2. Water** — How long someone survives without water depends upon the individual and circumstances, but typically in comfortable surroundings, an adult can last roughly a week with little or no water.

**3. Food** — Like water, how long one can live without food depends upon a lot of variables but is generally measured in a few weeks to a few months.

**4. Shelter** — Again, this is dependent upon the surrounding environment, but hypothermia — a decline in core temperature — can be deadly. A person's normal temperature is 98.7 degrees Fahrenheit. If the core temperature drops to 91.4, a person slips into unconsciousness. At 86 degrees, the body loses the ability to control internal temperature. At 82.4 degrees, complete muscle failure. At the other end of the spectrum, a temperature of 107.6 degrees results in central nervous system breakdown. At slightly over 111 degrees, the brain overheats and causes death.

**5. Sleep** — After two nights without sleep, hallucinations begin. After five, serious mental health effects occur. There are estimates that 14 days and nights without sleep will result in death, though some experimenters have survived shorter sleepless periods.
